

Time	Aug 16 SUN	Aug 17 MON	Aug 18 TUE	Aug 19 WED	Aug 20 THU
8:00	Workshop Registration	(from 7:30AM)			
8:30		Registration			
9:00	CARPE-FC Workshop	Conference Opening	Plenary Talks 4, 5	Plenary Talks 6, 7	Concurrent site visit: 1. Ballard, MBFC 2. UBC Living Lab
9:30		9:45 Plenary Talks 1	Mark Verbrugge	Steve Holdcroft	
10:00		David Wilkinson	Viola Birss	Subhas Chalasani	
10:30		Break	Break	Break	
11:00		Keynote presentations	Keynote presentations	Keynote presentations	
11:30					
12:00					
12:30		Lunch	Lunch	Lunch	
13:00					
13:30		Plenary Talks 2, 3	Keynote presentations	Oral presentations	
14:00		Jean-Pol Dodelet			
14:30	Linda Nazar				
15:00	Conference Registration	Break	Break	Break	
15:30		Keynote presentations	Oral presentations	Oral presentations	
16:00					
16:30			Oral presentations	Conference Closing	
17:00					
17:30		Break			
18:00					
18:30					
19:00		Banquet			
19:30					
20:00					

Plenary: 45 min.

Keynote: 30 min.

Oral: 15 min. (Q&A inclusive)

Sessions

Plenary Presentations (45 minutes including Q&A)

Room 100 Scarfe Building

Session #	Title	First name	Last name
100	<i>Chair: Jijun Zhang</i>		<i>Aug. 17, 09:45-10:30</i>
P1	Electrochemical energy technologies for the 21st century	David	WILKINSON
100	<i>Chairs: Claude Lamy, Zhongwei Chen</i>		<i>Aug. 17, 13:30-15:00</i>
P2	Performance and durability of non-noble catalysts for oxygen reduction in proton exchange membrane fuel cells	Jean-Pol	DODELET
P3	Unravelling the complexities of electrochemical energy storage at the nanoscale	Linda	NAZAR
100	<i>Chairs: Mei Cai, Andy Sun</i>		<i>Aug. 18, 09:00-10:30</i>
P4	The need for high energy batteries for traction applications and investigation of the lithium-silicon system	Mark	VERBRUGGE
P5	Novel nanoscale templates and scaffolds for fuel cell applications	Viola	BIRSS
100	<i>Chairs: Fariborz Taghipour, Joey Jung</i>		<i>Aug. 19, 09:00-10:30</i>
P6	Hydrocarbon solid polymer electrolytes: from model systems to potential candidates	Steven	HOLDCROFT
P7	Advanced lead acid battery technologies	Subhas	CHALASANI

Keynote Presentations (30 minutes including Q&A)

Room/Session #	Title	First name	Last name
203	<i>Chair: Dave Ghosh</i>	<i>Aug. 17, 11:00-12:30</i>	
K01 1	Simulation of single and two-phase transport phenomena in catalyst layers	Ned	DJILALI
K01 2	Catalyst layers for PEM fuel cells: from physical principles of operation to advanced design	Michael	EIKERLING
K01 3	Degradation investigations of high temperature polymer electrolyte fuel cells with respect to the European project CISTEM	Peter	WAGNER
204	<i>Chair: Marc Secanell</i>	<i>Aug. 17, 11:00-12:30</i>	
K02 1	From hydrogen production in a proton exchange membrane electrolysis cell (PEMEC) to its utilization in a proton exchange membrane fuel cell (PEMFC): some considerations on the overall efficiencies	Claude	LAMY
K02 2	Experimental and computational study of proton exchange membrane electrolyzer cells for high-efficiency hydrogen production	Feng-Yuan	ZHANG
K02 3	Electrochemical behaviour of Pt supported on SiC based materials in electrodes for high temperature PEMFCs	Justo	LOBATO
208	<i>Chair: Keryn Lian</i>	<i>Aug. 17, 11:00-12:30</i>	
K03 1	Next-generation rechargeable batteries: electrochemistry, materials, and prospects	Yuguo	GUO
K03 2	Characterization of battery materials with scanning electrochemical microscope (SECM) and related systems	Tomokazu	MATSUE
K03 3	Recent progress on flow battery: research and development	Huamin	ZHANG
209	<i>Chair:</i>	<i>Aug. 17, 11:00-12:30</i>	
K20 1	Sulfur-rich polymer materials with semi-interpenetrating network structure used in lithium-sulfur battery applications	Yuezhong	MENG
K20 2	Controlled synthesis of micro/nanostructured metal-based materials	Wenbin	HU
K20 3	Efficient electrochemical reduction of oxygen catalyzed by graphene quantum dots dispersed on graphene nanoribbons	Shun	WANG
203	<i>Chair: Justo Lobato</i>	<i>Aug. 17, 15:30-17:00</i>	
K04 1	Status of SOFC technology & its commercialization worldwide	Dave	GHOSH
K04 2	La(Sr)Fe(Mn)O ₃ interlayer for low temperature solid oxide fuel cells using LaGaO ₃ electrolyte	Tatsumi	ISHIHARA
K04 3	The strategy to improve the stability of PEM fuel cell catalysts	Shichun	MU
204	<i>Chair: Yuguo Guo</i>	<i>Aug. 17, 15:30-17:00</i>	

K05	1	Improve the photoelectrochemical activity of graphitic carbon nitride by regulating its crystallinity	Jianhai	WANG
K05	2	The development of efficient and stable nanocatalysts for fuel cells	Jin-Song	HU
K05	3	Pronounced photoelectric response of n-type poly(aniline-co-diphenylamine and 5-aminosalicylic acid) semiconductor	Shaolin	MU

208	<i>Chair: Jinli Qiao</i>		<i>Aug. 17, 15:30-17:00</i>	
------------	--------------------------	--	-----------------------------	--

K06	1	Electrolyte additive for suppressing self-discharge of high voltage cathodes for lithium ion batteries	Weishan	LI
K06	2	Electrolytes for Si-based Electrodes	Mei	CAI
K06	3	Advances in polymer electrolytes for solid flexible supercapacitors	Keryn	LIAN

209	<i>Chair: Michael Eikerling</i>		<i>Aug. 17, 15:30-17:00</i>	
------------	---------------------------------	--	-----------------------------	--

K07	1	Multistate near-infrared electrochromism and memory in electropolymerized films of ruthenium complexes	Yu-Wu	ZHONG
K07	2	Self-assembled hierarchical yolk-shell structured NiO@c from metal-organic frameworks with outstanding performance for lithium storage	Hong	GUO
K07	3	Three-dimensional networks of covalently bonding sp ² -hybridized carbon nanostructures for electrochemical energy storage	Hengxing	JI

203	<i>Chair: Pei Kang Shen</i>		<i>Aug. 18, 11:00-12:30</i>	
------------	-----------------------------	--	-----------------------------	--

K08	1	Segmented dynamic model of PEM fuel cell systems	Jian	CHEN
K08	2	Mass transport in fuel cell electrodes	Marc	SECANELL
K08	3	3D multi-physic modeling and validation of a gas diffusion electrode for analyzing transport and kinetic phenomena of noble and non-noble based catalysts for PEMFC	Stefania	SPECCHIA

204	<i>Chair: Nicolas Alonso-Vante</i>		<i>Aug. 18, 11:00-12:30</i>	
------------	------------------------------------	--	-----------------------------	--

K09	1	Bio-organic-inorganic (BOI) hybrid materials for low cost high performing fuel cell catalysts	Rongzhong	JIANG
K09	2	Pt-free catalyst for oxygen reduction reaction in fuel cells	Zidong	WEI
K09	3	Doped reduced graphene oxide mounted with Ru for Li-O ₂ battery application	Shijun	LIAO

208	<i>Chair: Dingguo Xia</i>		<i>Aug. 18, 11:00-12:30</i>	
------------	---------------------------	--	-----------------------------	--

K10	1	A theoretical calculation study of graphene-based electrocatalysts for oxygen reduction reaction	Shengli	CHEN
K10	2	Porous carbon fiber and its supported Pt as the catalyst for improved performance of ORR	Guang	LI
K10	3	SOFC development in Huazhong University of Science and Technology	Jian	LI

209	<i>Chair: Jianguo Liu</i>		<i>Aug. 18, 11:00-12:30</i>	
------------	---------------------------	--	-----------------------------	--

K11	1	Cu monolayer deposited on (100) preferentially oriented Pt nanostructured films: crystallographic surface orientation and synergetic effect for NO ₃ ⁻ reduction	Daniel	GUAY
K11	2	Hierarchical three-dimensional carbon nanostructures for flexible high-energy supercapacitors	Yuegang	ZHANG
K11	3	Design of advanced hybrid supercapacitors with high energy density	Xingbin	YAN
203	<i>Chair: Stefania Specchia</i>		<i>Aug. 18, 13:30-15:00</i>	
K12	1	Supports materials and catalytic centers for the oxygen reduction reaction	Nicolas	ALONSO-VANTE
K12	2	Electrocatalysts for fuel cells	Minhua	SHAO
K12	3	Nano-electrocatalysts for fuel cells and wastewater treatment	Shuhui	SUN
204	<i>Chair: Rongzhong Jiang</i>		<i>Aug. 18, 13:30-15:00</i>	
K13	1	The synthesis and characterization of an intermetallic compound AuNb ₃ /c as a novel ORR catalyst	Dingguo	XIA
K13	2	Highly stable and active Pt-based electrocatalysts for PEM fuel cells	Andy	SUN
K13	3	TBD	Lin	ZHUANG
208	<i>Chair: Guang Li</i>		<i>Aug. 18, 13:30-15:00</i>	
K14	1	Fluorine doped tantalum carbides as an efficient non-precious metal catalyst for hydrogen evolution reaction in acidic media	Pei Kang	SHEN
K14	2	The research of two backbones for high temperature proton	Hong	ZHU
K14	3	Selective edge-positioning of sulfur and nitrogen in dual-doped carbon nanosheets with interconnected structure for oxygen reduction reaction	Wensheng	YANG
209	<i>Chair: Daniel Guay</i>		<i>Aug. 18, 13:30-15:00</i>	
K15	1	Scalable production of two-dimensional crystals as materials for energy conversion and storage	Jong-Beom	BAEK
K15	2	Advances on aqueous supercapacitors with high energy density	YP	WU
K15	3	Well-ordered Ru@Pt core-shell nanocatalysts with enhanced electrocatalytic properties	Jianguo	LIU
203	<i>Chair: Yuyu Liu</i>		<i>Aug. 19, 11:00-12:30</i>	
K16	1	Surface and interface modulation for tuning electrocatalytic performance of metal nanocrystals	Yujie	XIONG
K16	2	Electrochemical treatment of catalytic surfaces for enhancing small organic molecules electro-oxidation	Alessandro	LAVACCHI
K16	3	Advanced M/N-S/C non-precious metal electrocatalysts based on nitrogen-rich small molecule precursors for oxygen reduction reaction	Jinli	QIAO

204		<i>Chair: Ping He</i>	<i>Aug. 19, 11:00-12:30</i>	
K17	1	Nanoscale Catalysis Arts in Hydrogen Energy Production	Chang Ming	LI
K17	2	Application of computational materials science in the development of lithium-ion battery materials	Siqi	SHI
K17	3	A three-dimensional nanostructured core-shell electrode architecture for battery-supercapacitor hybrids	Jun	LI
208		<i>Chair: Kuei-Hsien Chen</i>	<i>Aug. 19, 11:00-12:30</i>	
K18	1	Alkaline polymer membranes for fuel cell applications : challenging PEMFC?	Gerald	POURCELLY
K18	2	Fe ₃ C@carbon nanocapsules/expanded graphite as anode materials for lithium ion batteries	Qing-Yu	LI
K18	3	Nanoalloy electrocatalysts	Chuan-Jian	ZHONG
209		<i>Chair: Zidong Wei</i>	<i>Aug. 19, 11:00-12:30</i>	
K19	1	Controlled synthesis of Pt nanostructures towards efficient electrocatalysis	Xin	WANG
K19	2	Demonstration of water electrolysis in molten potassium dihydrogen phosphate KH ₂ PO ₄ at ~300 °C by means of Raman spectroscopy	Rolf	BERG
K19	3	Polymer Threaded in MOF as a Microporous Solid Electrolyte with Fast Exchange and High Selectivity	Kwong-Yu	CHAN

Oral Presentations (15 minutes including Q&A)

Room/Session #	Title	First name	Last name
Rm 203			
<i>Chair: Jinqing Kan</i>		<i>Aug. 18, 15:30-17:30</i>	
O01	1 The movement of Pt band: an inside story	Luke	DAMRON
O01	2 Spatial fingerprint of the catalyst layer degradation in PEM fuel cell	Shankar	DHANUSHKODI
O01	3 Population balance modeling of degradation in porous electrodes	Thomas	KADYK
O01	4 EFFECT OF COBALT CATION (Co ²⁺) ON FUEL CELL PERFORMANCE AND DURABILITY	Ruichun	JIANG
O01	5 Nickel and high-nickel alloys as catalysts for oxygen evolution reaction in intermediate-temperature water electrolysis	Irina	PETRUSHINA
O01	6 Enhancing stability of iridium-based mixed metal oxides for electrochemical water splitting	Camillo	SPOERI
O01	7 Electrochemical reduction of CO ₂ : a key player in renewable energy storage	Sona	KAZEMI
O01	8 Electrochemical reduction of CO ₂ into syngas: an alternative towards renewable energy storage	Sona	KAZEMI
Rm 204			
<i>Chair: Xuan Zhang</i>		<i>Aug. 18, 15:30-17:30</i>	
O02	1 High energy lithium-ion research and development at Argonne National Laboratory	Jason	CROY
O02	2 New electrolyte additive for enhancing anode protection	Wu	XU
O02	3 Investigations of temperature influenced calendaring process on Li[Ni _{1/3} Mn _{1/3} Co _{1/3}]O ₂ cathode	Maira	INDRIKOVA
O02	4 In-situ synthesis of carbon fiber-supported SiO _x as anode materials for lithium-ion battery	Biao	WANG
O02	5 Silicon anodes for lithium batteries - from science to engineering	Junbing	YANG
O02	6 Impact of electrolysis acid concentration on the characteristics and performance of electrolytic manganese dioxide for rechargeable alkaline (MnO ₂ /Zn) batteries	David	WILKINSON
O02	7 Synthesis and characterization of siloxane electrolyte containing fluorosulfonyl imide lithium salt for Li-ion batteries	Hohyoun	JANG
O02	8 Synthesis and characterization of siloxane electrolyte containing fluorosulfonyl urea lithium salt for Li-ion batteries	Hohyoun	JANG
Rm 206			
<i>Chair: Hongyao Xu</i>		<i>Aug. 18, 15:30-17:30</i>	
O03	1 Structure and properties of sulfonated copoly(arylene ether sulfone)s containing fluorinated side chains as proton exchange membrane	Riming	CHEN

O03	2	Comparative neutron reflectometry study of Nafion TH1 films on SiO ₂ , carbon and carbon/Pt substrates as a function of temperature and relative humidity	Peter	KALISVAART
O03	3	Nafion "humidified" by hydroxyl functionalized ionic liquids for high temperature proton exchange membranes	Xianbo	JIN
O03	4	A fuel cell hybrid vehicle powertrain emulator: energy management and experimental analysis	Di	SHEN
O03	5	A proposal for a standardized start-up and shut-down protocol for polymer electrolyte membrane fuel cells	Max	SCHWAGER
O03	6	The sulfonated poly(phenylene) membranes containing multi-phenyl rings prepared by nickel catalyst	Jiho	YOO
O03	7	Studies of grafted and sulfonated poly(isatin-ethersulfone) membranes by super acid-catalyzed reaction for PEMFC applications	Jiho	YOO
O03	8	Hierarchical heterostructures as promising electrode materials for supercapacitors	Hui	XIA

Rm 207	<i>Chair: Yujiang Song</i>		<i>Aug. 18, 15:30-17:30</i>	
---------------	----------------------------	--	-----------------------------	--

O04	1	A lithium bromide rechargeable battery with non-aqueous liquid electrolyte	Xiaoli	XI
O04	2	Manganese oxide based host cathode materials for aqueous alkaline metal ion batteries	Dianxue	CAO
O04	3	Electrochemical performance of NaMnFe ₂ (PO ₄) ₃ as a novel cathode material for sodium-ion battery	Yijing	WANG
O04	4	Nanocarbon-based structured materials for catalyst supports in fuel cells and electrochemical biosensors	Xuan	ZHANG
O04	5	Facile synthesis of core-shell structured s@polypyrrole composite as cathode of lithium-sulfur battery with ultrahigh capacity	Hongbin	ZHAO
O04	6	Preparation of activated porous carbons derived from fallen camellia for high performance supercapacitor electrode	Xi'an	CHEN
O04	7	Dissolution and liquid crystals phase of polymeric carbon nitride	Zhixin	ZHOU
O04	8	Metal organic framework derived porous carbon and metal oxide as anode materials for sodium-ion battery	Yang	ZHAO

Rm 208	<i>Chair: Youjun Fan</i>		<i>Aug. 18, 15:30-17:30</i>	
---------------	--------------------------	--	-----------------------------	--

O05	1	Layered transition metal oxynitride catalyst Co ₃ Mo ₂ O _x N ₆ /C for oxygen reduction reaction	An	LI
O05	2	First principles computational study of highly stable and active ternary PtCuNi nanocatalyst for oxygen reduction reaction	Byungchan	HAN
O05	3	Heteroatom (N and S) co-doped hierarchically porous carbons (HPCs) as high efficient non-precious metal catalysts for oxygen reduction reaction	Mingjie	WU

O05	4	A comparative study of the $\text{La}_{n+1}\text{Ni}_n\text{O}_{3n+1}$ Ruddlesden-Popper series ($n = 1, 2, 3$ and ∞) for oxygen reduction and evolution reactions	Zhongping	SHAO
O05	5	Template-free synthesis of polyhedral Pd-Pt nanocrystals electrocatalysts for oxygen reduction reaction	Yongfu	TANG
O05	6	One step synthesis of fluorine and chlorine co-doped graphene for enhanced electrocatalytic reduction of oxygen	Shun	WANG
O05	7	One step synthesis of fluorine and chlorine co-doped graphene for enhanced electrocatalytic reduction of oxygen	Weilin	XU
O05	8	Free-standing N-doped carbon film as the metal-free catalyst for oxygen reduction reaction	Gaopeng	JIANG
Rm 209		<i>Chair: Yida Deng</i>	<i>Aug. 18, 15:30-17:30</i>	
O06	1	Interface engineering of CVD-graphene for enhanced photovoltaic performance	Yu	WANG
O06	2	Controlled formation of uniform surface coatings for improved battery performance	An-min	CAO
O06	3	Visible light sensitive nanocomposite Pt/CdS/Co-doped ZnO for efficient photocatalytic water splitting	Neelu	CHOUHAN
O06	4	Photoelectrochemistry of poly-3-hexylthiophene – a fundamental research on photoelectrochemical reduction of organic anthraquinone species in aqueous medium	Pankaj	CHOWDHURY
O06	5	Electrochemical synthesis of n-type poly(aniline-co-diphenylamine) and its novel photoelectric response	Qiaofang	SHI
O06	6	Development of high performance room temperature photo-electrochemical gas sensors using ZnO-NiO heterostructures	Fariborz	TAGHIPOUR
O06	7	Implementing an in-situ carbon network in Si/reduced graphene oxide for high performance lithium-ion battery anodes	Kun	FENG
O06	8	Sodium-oxygen batteries: chemical and electrochemical reaction mechanisms	Hossein	YADEGARI
Rm 203		<i>Chair: Weixin Zhang</i>	<i>Aug. 19, 13:30-15:00</i>	
O07	1	Low cost nanocomposite catalysts for lithium-air batteries	Chunwen	SUN
O07	2	Facile synthesis and electrochemical performance of $\text{MoO}_2/\text{Mo}_2\text{C}/\text{C}$ composite for lithium-ion batteries	Zhongping	SHAO
O07	3	Studies on zinc properties in aqueous zinc-polyaniline rechargeable battery	Jinqing	KAN
O07	4	Rechargeability of manganese dioxide-zinc (RAM) batteries	Arman	BONAKDARPOUR
O07	5	Investigation of cathode additives in flat-plate rechargeable alkaline manganese dioxide-zinc (RAM) batteries	Sean	MEHTA

O07	6	Impact of electrolysis acid concentration on the characteristics and performance of electrolytic manganese dioxide for rechargeable alkaline (MnO ₂ /Zn) batteries	Farhang	NESVADERANI
Rm 204		<i>Chair: Hongbin Zhao</i>	<i>Aug. 19, 13:30-15:00</i>	
O08	1	Research and development of ion conducting membranes for flow battery application	Xianfeng	LI
O08	2	Hierarchically porous N-doped graphene foam as highly efficient electrocatalysts for oxygen reduction	Xuejun	ZHOU
O08	3	High performance Nafion®/ poly(ethylene-alt-maleic anhydride) membranes for fuel cells applications	Sang-June	CHOI
O08	4	Novel polybenzimidazoles containing bulky side groups for high-temperature polymer electrolyte membranes fuel cell applications	JYH-Chien	CHEN
O08	5	Specific electrical conductivity in molten potassium dihydrogen phosphate KH ₂ PO ₄ electrolyte at ~300 °c	Aleksey	NIKIFOROV
O08	6	Chemical stability of La _{0.6} Sr _{0.4} Co _{0.2} Fe _{0.8} O _{3-δ} as SOFC cathode	Xingwei	WANG
Rm 206		<i>Chair: Ruichun Jiang</i>	<i>Aug. 19, 13:30-15:00</i>	
O09	1	Toward solar hydrogen generation: GaN:ZnO solid solution – reduced graphene oxide nanocomposite	Babak	ADELI
O09	2	A novel composite nonwoven separator for lithium-ion battery	Hong	WANG
O09	3	Engineering molybdenum oxide nanoarchitectures for robust lithium storage	Jiangfeng	NI
O09	4	High rate capacity Si@SiO _x /graphene hydrogel composite electrode for lithium-ion battery	Xuejun	BAI
O09	5	A preliminary study on the influence of fiber finess of nonwoven-based separator on the performance of li-ion battery	Hong	WANG
O09	6	Palladium nanotubes: fabrication and application in ethanol electrocatalysis	Xiaojun	HAN
Rm 207		<i>Chair: Biao Wang</i>	<i>Aug. 19, 13:30-15:00</i>	
O10	1	Modeling of battery energy storage system for smart grid	Zheng	LI
O10	2	Mesoporous cobalt oxide for oxygen evolution reaction under alkaline conditions: a comparative study of three synthesis methods	Stefania	SPECCHIA
O10	3	Mesoporous metal nitride materials for PEM fuel cell application	Minghui	YANG
O10	4	Synthesis and performance of anisotropic porous transport layers	Devin	TODD
O10	5	Development of a high active area air-breathing micro-direct methanol fuel cell	Yinghui	ZHANG
O10	6	Development of atomic and molecular layer deposition coated cathodes for highly stable lithium-sulfur batteries	Xia	LI

Rm 208		<i>Chair: Minhua Shao</i>	<i>Aug. 19, 13:30-15:00</i>	
O11	1	Substrate effects on Li ⁺ deposition in lithium secondary batteries with competitive kinetics model	Yifu	YANG
O11	2	Multi-scale computational design of multifunctional materials for energy application beyond conventional limit	Byungchan	HAN
O11	3	Surface oxide formation on Pt(111): a DFT study of structural and electronic properties	Michael	EIKERLING
O11	4	Molecular modeling of proton distribution at the PtO ₂ /ionomer interface in the PEMFC catalyst layer	A	NOURI-KHORASANI
O11	5	Microscale model of oxygen bubbles in the porous transport layer of PEM water electrolyzers	A	NOURI-KHORASANI
O11	6	Electricity generation and bubble behaviors of an air-breathing microfluidic fuel cell with cylinder anodes operated under different tilted angles	Dingding	YE
Rm 209		<i>Chair: Baizeng Fang</i>	<i>Aug. 19, 13:30-15:00</i>	
O12	1	Effects of spinel phase content on electrochemical properties of the layered-spinel cathode material for lithium-ion batteries	CS	SHI
O12	2	An aptamersensor for detection of 17 β -estradiol(e2) based on modified electrode with nano-gold-graphene-nafion	JianShe	LIU
O12	3	Scalable, facile, continuous spinning of graphene-based hybrid fibers for wearable energy storage	Shaohua	CHEN
O12	4	Electrosynthesis of ferrates at neutral at neutral conditions using boron doped diamond electrodes	Macarena	HERNANDEZ
O12	5	Preparation of free-standing 3D graphene foams	Naiquin	ZHAO
O12	6	Novel MnCo ₂ O ₄ assemblies as anode materials for Li-ion battery	SM	ZHANG
Rm 203		<i>Chair: JianShe Liu</i>	<i>Aug. 19, 15:30-16:45</i>	
O13	1	Facile fabrication of three-dimensional highly ordered structural polyaniline/graphene bulk hybrid materials for high performance supercapacitor electrodes	Hongyao	XU
O13	2	Controllable synthesis of three-dimensional hierarchical porous carbon networks via soluble salts in-situ templates as supercapacitor electrodes	S	ZHU
O13	3	Ni ₃ S ₂ /3D graphene as high performance cathode materials for asymmetric supercapacitors	Xiaomin	WANG
O13	4	Nitrogen-doped porous carbon as electrode materials for high-performance supercapacitor	L	WANG
O13	5	Transition metal macrocyclic catalysts for oxygen reduction reaction	Yuyu	LIU
Rm 204		<i>Chair: Qing-Yu Li</i>	<i>Aug. 19, 15:30-16:45</i>	
O14	1	In-situ PEMFC reference electrode study	Ping	HE
O14	2	Pt-based and non-pt-based electrocatalysts for fuel cells	Deli	WANG

O14	3	Controlled synthesis of high-performance electrocatalysts for proton exchange membrane fuel cells	Yujiang	SONG
O14	4	Influence of the metallic Ni- or Mo- precursors in the synthesis of Ti ₃ O ₅ as potential support for methanol tolerant ORR Pt-based catalysts	R	ALIPOUR
O14	5	Hierarchical Nanostructured Carbons as Advanced Electrochemical Energy Materials	Baizeng	FANG
Rm 206 <i>Chair: Sung June Choi</i> <i>Aug. 19, 15:30-16:45</i>				
O15	1	Heat-treated non-precious catalysts for oxygen reduction reaction in PEMFCs using pyrolyzed wasted tire carbon black as precursor	Wenmu	LI
O15	2	Facile synthesis of pdptni alloy nanoparticles on carbon nanotubes and their enhanced performance for formic acid electrooxidation	Youjun	FAN
O15	3	Carbon based noble-metal-free catalysts for high performance oxygen reduction	Ji	LIANG
O15	4	Hydrogen oxidation reaction selective catalyst for mitigating air/air startup/shutdown performance losses	Dustin	BANHAM
O15	5	Ternary hybrid CdS-SiO ₂ -TiO ₂ composite film for photocatalytic fuel cell	R	CHEN
Rm 207 <i>Chair: Feng-Yuan Zhang</i> <i>Aug. 19, 15:30-16:45</i>				
O16	1	Advanced Si materials for high energy Li-ion batteries	Zhongwei	CHEN
O16	2	Determination of water vapor pressure over and demonstration of water electrolysis in molten potassium dihydrogen phosphate KH ₂ PO ₄ at ~300 °C by means of Raman spectroscopy	Rolf	BERG
O16	3	Hydrazine electrooxidation performances at epitaxial IrPt (100) alloys	Sebastien	GARBARINO
O16	4	Hydrogen evolution reaction properties and characterization of nickel phosphorous nanotubes and nanospheres	Yida	DENG
O16	5	Hierarchical Nanostructured Carbons as Advanced Electrochemical Energy Materials	Baizeng	FANG
Rm 208 <i>Chair: Shichun Mu</i> <i>Aug. 19, 15:30-16:45</i>				
O17	1	The design and electrochemical performances of micro-/nano- NiCo ₂ O ₄ materials	Yijing	WANG
O17	2	The research on antireflection properties and carrier lifetime of silicon nanowire arrays prepared through mace technology	Wenhui	MA
O17	3	Ag ₂ s-assisted growth of CuInS ₂ /CdS heterostructured nanorods	Chao	ZOU
O17	4	Electrocatalytic properties of nanosize Pt-Au alloys supported on ultrathin ordered porous electrodes	Byron	GATES

O17	5	Facile synthesis of helically coiled porous carbon fiber and applications in electrochemistry catalyst fields	Keqin	YANG
Rm 209		<i>Chair: Kwong-Yu Chan</i>	<i>Aug. 19, 15:30-16:45</i>	
O18	1	Key materials designation for lithium/sulfur batteries with high energy density	Hongzhan g	ZHANG
O18	2	Understanding of nanocrystallization effect on structure stability in layered Li-rich material	Jin	MA
O18	3	Structural and property changes of LiNi _{0.5} Mn _{1.5} O ₄ induced by octahedral vacancy and carbon coating	Hailong	WANG
O18	4	Non-precious Fe-N/C catalysts derived from ionic liquid for highly efficient oxygen reduction reaction	Fei	HE
O18	5	Ethanol-mediated co-precipitation: a general strategy to prepare 1D hierarchical manganese-based electrode materials for enhanced performances in lithium ion battery	Weixin	ZHANG

List of Chairs

P1	<i>Jiujun Zhang</i>	<i>Aug. 17, 09:30-11:00</i>
P2,P3	<i>Claude Lamy, Zhongwei Chen</i>	<i>Aug. 17, 13:30-15:00</i>
P4,P5	<i>Mei Cai, Andy Sun</i>	<i>Aug. 18, 09:30-11:00</i>
P6,P7	<i>Fariborz Taghipour, Joey Jung</i>	<i>Aug. 19, 09:30-11:00</i>
K01	<i>Chair:Dave Ghosh</i>	<i>Aug. 17, 11:00-12:30</i>
K02	<i>Chair:Marc Secanell</i>	<i>Aug. 17, 11:00-12:30</i>
K03	<i>Chair:Keryn Lian</i>	<i>Aug. 17, 11:00-12:30</i>
K04	<i>Justo Lobato</i>	<i>Aug. 17, 15:30-17:00</i>
K05	<i>Yuguo Guo</i>	<i>Aug. 17, 15:30-17:00</i>
K06	<i>Jinli Qiao</i>	<i>Aug. 17, 15:30-17:00</i>
K07	<i>Michael Eikerling</i>	<i>Aug. 17, 15:30-17:00</i>
K08	<i>Chair:Pei Kang Shen</i>	<i>Aug. 18, 11:00-12:30</i>
K09	<i>Nicolas Alonso-Vante</i>	<i>Aug. 18, 11:00-12:30</i>
K10	<i>Dingguo Xia</i>	<i>Aug. 18, 11:00-12:30</i>
K11	<i>Jianguo Liu</i>	<i>Aug. 18, 11:00-12:30</i>
K12	<i>Stefania Specchia</i>	<i>Aug. 18, 13:30-15:00</i>
K13	<i>Rongzhong Jiang</i>	<i>Aug. 18, 13:30-15:00</i>
K14	<i>Guang Li</i>	<i>Aug. 18, 13:30-15:00</i>
K15	<i>Daniel Guay</i>	<i>Aug. 18, 13:30-15:00</i>
K16	<i>Yuyu Liu</i>	<i>Aug. 19, 11:00-12:30</i>
K17	<i>Ping He</i>	<i>Aug. 19, 11:00-12:30</i>
K18	<i>Kuei-Hsien Chen</i>	<i>Aug. 19, 11:00-12:30</i>
K19	<i>Zidong Wei</i>	<i>Aug. 19, 11:00-12:30</i>
O01	<i>Jinqing Kan</i>	<i>Aug. 18, 15:30-17:30</i>
O02	<i>Xuan Zhang</i>	<i>Aug. 18, 15:30-17:30</i>
O03	<i>Hongyao Xu</i>	<i>Aug. 18, 15:30-17:30</i>
O04	<i>Yujiang Song</i>	<i>Aug. 18, 15:30-17:30</i>
O05	<i>Youjun Fan</i>	<i>Aug. 18, 15:30-17:30</i>
O06	<i>Yida Deng</i>	<i>Aug. 18, 15:30-17:30</i>
O07	<i>Weixin Zhang</i>	<i>Aug. 19, 13:30-15:00</i>
O08	<i>Hongbin Zhao</i>	<i>Aug. 19, 13:30-15:00</i>
O09	<i>Ruichun Jiang</i>	<i>Aug. 19, 13:30-15:00</i>
O10	<i>Biao Wang</i>	<i>Aug. 19, 13:30-15:00</i>
O11	<i>Minhua Shao</i>	<i>Aug. 19, 13:30-15:00</i>
O12	<i>Baizeng Fang</i>	<i>Aug. 19, 13:30-15:00</i>
O13	<i>JianShe Liu</i>	<i>Aug. 19, 15:30-17:00</i>
O14	<i>Qing-Yu Li</i>	<i>Aug. 19, 15:30-17:00</i>
O15	<i>Sung June Choi</i>	<i>Aug. 19, 15:30-17:00</i>
O16	<i>Feng-Yuan Zhang</i>	<i>Aug. 19, 15:30-17:00</i>
O17	<i>Shichun Mu</i>	<i>Aug. 19, 15:30-17:00</i>
O18	<i>Kwong-Yu Chan</i>	<i>Aug. 19, 15:30-17:00</i>

INDEX sorted by author's last name (A-Z)

Session #	Title	First name	Last name
O09	1 Toward solar hydrogen generation: GaN:ZnO solid solution – reduced graphene oxide nanocomposite	Babak	ADELI
O14	4 Influence of the metallic Ni- or Mo- precursors in the synthesis of Ti ₃ O ₅ as potential support for methanol tolerant ORR Pt-based catalysts	R	ALIPOUR
K12	1 Supports materials and catalytic centers for the oxygen reduction reaction	Nicolas	ALONSO-VANTE
K15	1 Scalable production of two-dimensional crystals as materials for energy conversion and storage	Jong-Beom	BAEK
O09	4 High rate capacity Si@SiOx/graphene hydrogel composite electrode for lithium-ion battery	Xuejun	BAI
O15	4 Hydrogen oxidation reaction selective catalyst for mitigating air/air startup/shutdown performance losses	Dustin	BANHAM
K19	2 Demonstration of water electrolysis in molten potassium dihydrogen phosphate KH ₂ PO ₄ at ~300 °C by means of Raman spectroscopy	Rolf	BERG
O16	2 Determination of water vapor pressure over and demonstration of water electrolysis in molten potassium dihydrogen phosphate KH ₂ PO ₄ at ~300 °C by means of Raman spectroscopy	Rolf	BERG
O07	4 Rechargeability of manganese dioxide-zinc (RAM) batteries	Arman	BONAKDARPOUR
K06	2 Electrolytes for Si-based Electrodes	Mei	CAI
O04	2 Manganese oxide based host cathode materials for aqueous alkaline metal ion batteries	Dianxue	CAO
O06	2 Controlled formation of uniform surface coatings for improved battery performance	An-min	CAO
K19	3 Polymer Threaded in MOF as a Microporous Solid Electrolyte with Fast Exchange and High Selectivity	Kwong-Yu	CHAN
K08	1 Segmented dynamic model of PEM fuel cell systems	Jian	CHEN
K10	1 A theoretical calculation study of graphene-based electrocatalysts for oxygen reduction reaction	Shengli	CHEN
O03	1 Structure and properties of sulfonated copoly(arylene ether sulfone)s containing fluorinated side chains as proton exchange membrane	Riming	CHEN
O04	6 Preparation of activated porous carbons derived from fallen camellia for high performance supercapacitor electrode	Xi'an	CHEN
O08	4 Novel polybenzimidazoles containing bulky side groups for high-temperature polymer electrolyte membranes fuel cell applications	JYH-Chien	CHEN

O12	3	Scalable, facile, continuous spinning of graphene-based hybrid fibers for wearable energy storage	Shaohua	CHEN
O15	5	Ternary hybrid CdS-SiO ₂ -TiO ₂ composite film for photocatalytic fuel cell	R	CHEN
O16	1	Advanced Si materials for high energy Li-ion batteries	Zhongwei	CHEN
O08	3	High performance Nafion®/ poly(ethylene-alt-maleic anhydride) membranes for fuel cells applications	Sang-June	CHOI
O06	3	Visible light sensitive nanocomposite Pt/CdS/Co-doped ZnO for efficient photocatalytic water splitting	Neelu	CHOUHAN
O06	4	Photoelectrochemistry of poly-3-hexylthiophene – a fundamental research on photoelectrochemical reduction of organic anthraquinone species in aqueous medium	Pankaj	CHOWDHURY
O02	1	High energy lithium-ion research and development at Argonne National Laboratory	Jason	CROY
O01	1	The movement of Pt band: an inside story	Luke	DAMRON
O16	4	Hydrogen evolution reaction properties and characterization of nickel phosphorous nanotubes and nanospheres	Yida	DENG
O01	2	Spatial fingerprint of the catalyst layer degradation in PEM fuel cell	Shankar	DHANUSHKODI
K01	1	Simulation of single and two-phase transport phenomena in catalyst layers	Ned	DJILALI
K01	2	Catalyst layers for PEM fuel cells: from physical principles of operation to advanced design	Michael	EIKERLING
O11	3	Surface oxide formation on Pt(111): a DFT study of structural and electronic properties	Michael	EIKERLING
O15	2	Facile synthesis of pdptni alloy nanoparticles on carbon nanotubes and their enhanced performance for formic acid electrooxidation	Youjun	FAN
O14	5	Hierarchical Nanostructured Carbons as Advanced Electrochemical Energy Materials	Baizeng	FANG
O16	5	Hierarchical Nanostructured Carbons as Advanced Electrochemical Energy Materials	Baizeng	FANG
O06	7	Implementing an in-situ carbon network in Si/reduced graphene oxide for high performance lithium-ion battery anodes	Kun	FENG
O16	3	Hydrazine electrooxidation performances at epitaxial IrPt (100) alloys	Sebastien	GARBARINO
O17	4	Electrocatalytic properties of nanosize Pt-Au alloys supported on ultrathin ordered porous electrodes	Byron	GATES
K04	1	Status of SOFC technology & its commercialization worldwide	Dave	GHOSH

K11	1	Cu monolayer deposited on (100) preferentially oriented Pt nanostructured films: crystallographic surface orientation and synergetic effect for NO ₃ ⁻ reduction	Daniel	GUAY
K03	1	Next-generation rechargeable batteries: electrochemistry, materials, and prospects	Yuguo	GUO
K07	2	Self-assembled hierarchical yolk-shell structured NiO@c from metal-organic frameworks with outstanding performance for lithium storage	Hong	GUO
O05	2	First principles computational study of highly stable and active ternary PtCuNi nanocatalyst for oxygen reduction reaction	Byungchan	HAN
O09	6	Palladium nanotubes: fabrication and application in ethanol electrocatalysis	Xiaojun	HAN
O11	2	Multi-scale computational design of multifunctional materials for energy application beyond conventional limit	Byungchan	HAN
O14	1	In-situ PEMFC reference electrode study	Ping	HE
O18	4	Non-precious Fe-N/C catalysts derived from ionic liquid for highly efficient oxygen reduction reaction	Fei	HE
O12	4	Electrosynthesis of ferrates at neutral at neutral conditions using boron doped diamond electrodes	Macarena	HERNANDEZ
K20	2	Controlled synthesis of micro/nanostructured metal-based materials	Wenbin	HU
K05	2	The development of efficient and stable nanocatalysts for fuel cells	Jin-Song	HU
O02	3	Investigations of temperature influenced calendring process on Li[Ni _{1/3} Mn _{1/3} Co _{1/3}]O ₂ cathode	Maira	INDRIKOVA
K04	2	La(Sr)Fe(Mn)O ₃ interlayer for low temperature solid oxide fuel cells using LaGaO ₃ electrolyte	Tatsumi	ISHIHARA
O02	7	Synthesis and characterization of siloxane electrolyte containing fluorosulfonyl imide lithium salt for Li-ion batteries	Hohyoun	JANG
O02	8	Synthesis and characterization of siloxane electrolyte containing fluorosulfonyl urea lithium salt for Li-ion batteries	Hohyoun	JANG
K07	3	Three-dimensional networks of covalently bonding sp ² -hybridized carbon nanostructures for electrochemical energy storage	Hengxing	JI
K09	1	Bio-organic-inorganic (BOI) hybrid materials for low cost high performing fuel cell catalysts	Rongzhong	JIANG
O01	4	EFFECT OF COBALT CATION (Co ²⁺) ON FUEL CELL PERFORMANCE AND DURABILITY	Ruichun	JIANG
O05	8	Free-standing N-doped carbon film as the metal-free catalyst for oxygen reduction reaction	Gaopeng	JIANG
O03	3	Nafion "humidified" by hydroxyl functionalized ionic liquids for high temperature proton exchange membranes	Xianbo	JIN

O01	3	Population balance modeling of degradation in porous electrodes	Thomas	KADYK
O03	2	Comparative neutron reflectometry study of Nafion TH1 films on SiO ₂ , carbon and carbon/Pt substrates as a function of temperature and relative humidity	Peter	KALISVAART
O07	3	Studies on zinc properties in aqueous zinc-polyaniline rechargeable battery	Jinqing	KAN
O01	7	Electrochemical reduction of CO ₂ : a key player in renewable energy storage	Sona	KAZEMI
O01	8	Electrochemical reduction of CO ₂ into syngas: an alternative towards renewable energy storage	Sona	KAZEMI
K02	1	From hydrogen production in a proton exchange membrane electrolysis cell (PEMEC) to its utilization in a proton exchange membrane fuel cell (PEMFC): some considerations on the overall efficiencies	Claude	LAMY
K16	2	Electrochemical treatment of catalytic surfaces for enhancing small organic molecules electro-oxidation	Alessandro	LAVACCHI
K06	1	Electrolyte additive for suppressing self-discharge of high voltage cathodes for lithium ion batteries	Weishan	LI
K10	2	Porous carbon fiber and its supported Pt as the catalyst for improved performance of ORR	Guang	LI
K10	3	SOFc development in Huazhong University of Science and Technology	Jian	LI
K17	1	Nanoscale Catalysis Arts in Hydrogen Energy Production	Chang Ming	LI
K17	3	A three-dimensional nanostructured core-shell electrode architecture for battery-supercapacitor hybrids	Jun	LI
K18	2	Fe ₃ C@carbon nanocapsules/expanded graphite as anode materials for lithium ion batteries	Qing-Yu	LI
O05	1	Layered transition metal oxynitride catalyst Co ₃ Mo ₂ O _x N ₆ /C for oxygen reduction reaction	An	LI
O08	1	Research and development of ion conducting membranes for flow battery application	Xianfeng	LI
O10	1	Modeling of battery energy storage system for smart grid	Zheng	LI
O10	6	Development of atomic and molecular layer deposition coated cathodes for highly stable lithium-sulfur batteries	Xia	LI
O15	1	Heat-treated non-precious catalysts for oxygen reduction reaction in PEMFCs using pyrolyzed wasted tire carbon black as precursor	Wenmu	LI
K06	3	Advances in polymer electrolytes for solid flexible supercapacitors	Keryn	LIAN
O15	3	Carbon based noble-metal-free catalysts for high performance oxygen reduction	Ji	LIANG

K09	3	Doped reduced graphene oxide mounted with Ru for Li-O2 battery application	Shijun	LIAO
K15	3	Well-ordered Ru@Pt core-shell nanocatalysts with enhanced electrocatalytic properties	Jianguo	LIU
O12	2	An aptamersensor for detection of 17 β -estradiol(e2) based on modified electrode with nano-gold-graphene- nafion	JianShe	LIU
O13	5	Transition metal macrocyclic catalysts for oxygen reduction reaction	Yuyu	LIU
K02	3	Electrochemical behaviour of Pt supported on SiC based materials in electrodes for high temperature PEMFCs	Justo	LOBATO
O17	2	The research on antireflection properties and carrier lifetime of silicon nanowire arrays prepared through mace technology	Wenhui	MA
O18	2	Understanding of nanocrystallization effect on structure stability in layered Li-rich material	Jin	MA
K03	2	Characterization of battery materials with scanning electrochemical microscope (SECM) and related systems	Tomokazu	MATSUE
O07	5	Investigation of cathode additives in flat-plate rechargeable alkaline manganese dioxide-zinc (RAM) batteries	Sean	MEHTA
K20	1	Sulfur-rich polymer materials with semi-interpenetrating network structure used in lithium-sulfur battery applications	Yuezhong	MENG
K04	3	The strategy to improve the stability of PEM fuel cell catalysts	Shichun	MU
K05	3	Pronounced photoelectric response of n-type poly(aniline-co-diphenylamine and 5-aminosalicylic acid) semiconductor	Shaolin	MU
O07	6	Impact of electrolysis acid concentration on the characteristics and performance of electrolytic manganese dioxide for rechargeable alkaline (MnO ₂ /Zn) batteries	Farhang	NESVADERANI
O09	3	Engineering molybdenum oxide nanoarchitectures for robust lithium storage	Jiangfeng	NI
O08	5	Specific electrical conductivity in molten potassium dihydrogen phosphate KH ₂ PO ₄ electrolyte at ~300 °c	Aleksey	NIKIFOROV
O11	4	Molecular modeling of proton distribution at the PtO/ionomer interface in the PEFC catalyst layer	A	NOURI-KHORASANI
O11	5	Microscale model of oxygen bubbles in the porous transport layer of PEM water electrolyzers	A	NOURI-KHORASANI
O01	5	Nickel and high-nickel alloys as catalysts for oxygen evolution reaction in intermediate-temperature water electrolysis	Irina	PETRUSHINA
K18	1	Alkaline polymer membranes for fuel cell applications : challenging PEMFC?	Gerald	POURCELLY
K16	3	Advanced M/N-S/C non-precious metal electrocatalysts based on nitrogen-rich small molecule precursors for oxygen reduction reaction	Jinli	QIAO

O03	5	A proposal for a standardized start-up and shut-down protocol for polymer electrolyte membrane fuel cells	Max	SCHWAGER
K08	2	Mass transport in fuel cell electrodes	Marc	SECANELL
K12	2	Electrocatalysts for fuel cells	Minhua	SHAO
O05	4	A comparative study of the $\text{La}_{n+1}\text{Ni}_n\text{O}_{3n+1}$ Ruddlesden-Popper series ($n = 1, 2, 3$ and ∞) for oxygen reduction and evolution reactions	Zhongpin g	SHAO
O07	2	Facile synthesis and electrochemical performance of $\text{MoO}_2/\text{Mo}_2\text{C}/\text{C}$ composite for lithium-ion batteries	Zhongpin g	SHAO
K14	1	Fluorine doped tantalum carbides as an efficient non-precious metal catalyst for hydrogen evolution reaction in acidic media	Pei Kang	SHEN
O03	4	A fuel cell hybrid vehicle powertrain emulator: energy management and experimental analysis	Di	SHEN
K17	2	Application of computational materials science in the development of lithium-ion battery materials	Siqi	SHI
O06	5	Electrochemical synthesis of n-type poly(aniline-co-diphenylamine) and its novel photoelectric response	Qiaofang	SHI
O12	1	Effects of spinel phase content on electrochemical properties of the layered-spinel cathode material for lithium-ion batteries	CS	SHI
O14	3	Controlled synthesis of high-performance electrocatalysts for proton exchange membrane fuel cells	Yujiang	SONG
K08	3	3D multi-physics modeling and validation of a gas diffusion electrode for analyzing transport and kinetic phenomena of noble and non-noble based catalysts for PEMFC	Stefania	SPECCHIA
O10	2	Mesoporous cobalt oxide for oxygen evolution reaction under alkaline conditions: a comparative study of three synthesis methods	Stefania	SPECCHIA
O01	6	Enhancing stability of iridium-based mixed metal oxides for electrochemical water splitting	Camillo	SPOERI
K12	3	Nano-electrocatalysts for fuel cells and wastewater treatment	Shuhui	SUN
K13	2	Highly stable and active Pt-based electrocatalysts for PEM fuel cells	Andy	SUN
O07	1	Low cost nanocomposite catalysts for lithium-air batteries	Chunwen	SUN
O06	6	Development of high performance room temperature photo-electrochemical gas sensors using ZnO-NiO heterostructures	Fariborz	TAGHIPOUR
O05	5	Template-free synthesis of polyhedral Pd-Pt nanocrystals electrocatalysts for oxygen reduction reaction	Yongfu	TANG
O10	4	Synthesis and performance of anisotropic porous transport layers	Devin	TODD

K01	3	Degradation investigations of high temperature polymer electrolyte fuel cells with respect to the European project CISTEM	Peter	WAGNER
K20	3	Efficient electrochemical reduction of oxygen catalyzed by graphene quantum dots dispersed on graphene nanoribbons	Shun	WANG
K05	1	Improve the photoelectrochemical activity of graphitic carbon nitride by regulating its crystallinity	Jianhai	WANG
K19	1	Controlled synthesis of Pt nanostructures towards efficient electrocatalysis	Xin	WANG
O02	4	In-situ synthesis of carbon fiber-supported SiO _x as anode materials for lithium-ion battery	Biao	WANG
O04	3	Electrochemical performance of NaMnFe ₂ (PO ₄) ₃ as a novel cathode material for sodium-ion battery	Yijing	WANG
O05	6	One step synthesis of fluorine and chlorine co-doped graphene for enhanced electrocatalytic reduction of oxygen	Shun	WANG
O06	1	Interface engineering of CVD-graphene for enhanced photovoltaic performance	Yu	WANG
O08	6	Chemical stability of La _{0.6} Sr _{0.4} Co _{0.2} Fe _{0.8} O _{3-δ} as SOFC cathode	Xingwei	WANG
O09	2	A novel composite nonwoven separator for lithium-ion battery	Hong	WANG
O09	5	A preliminary study on the influence of fiber finess of nonwoven-based separator on the performance of li-ion battery	Hong	WANG
O13	3	Ni ₃ S ₂ /3D graphene as high performance cathode materials for asymmetric supercapacitors	Xiaomin	WANG
O13	4	Nitrogen-doped porous carbon as electrode materials for high-performance supercapacitor	L	WANG
O14	2	Pt-based and non-pt-based electrocatalysts for fuel cells	Deli	WANG
O17	1	The design and electrochemical performances of micro-/nano- NiCo ₂ O ₄ materials	Yijing	WANG
O18	3	Structural and property changes of LiNi _{0.5} Mn _{1.5} O ₄ induced by octahedral vacancy and carbon coating	Hailong	WANG
K09	2	Pt-free catalyst for oxygen reduction reaction in fuel cells	Zidong	WEI
O02	6	Impact of electrolysis acid concentration on the characteristics and performance of electrolytic manganese dioxide for rechargeable alkaline (MnO ₂ /Zn) batteries	David	WILKINSON
K15	2	Advances on aqueous supercapacitors with high energy density	YP	WU
O05	3	Heteroatom (N and S) co-doped hierarchically porous carbons (HPCs) as high efficient non-precious metal catalysts for oxygen reduction reaction	Mingjie	WU

O04	1	A lithium bromide rechargeable battery with non-aqueous liquid electrolyte	Xiaoli	XI
K13	1	The synthesis and characterization of an intermetallic compound AuNb ₃ /c as a novel ORR catalyst	Dingguo	XIA
O03	8	Hierarchical heterostructures as promising electrode materials for supercapacitors	Hui	XIA
K16	1	Surface and interface modulation for tuning electrocatalytic performance of metal nanocrystals	Yujie	XIONG
O02	2	New electrolyte additive for enhancing anode protection	Wu	XU
O05	7	One step synthesis of fluorine and chlorine co-doped graphene for enhanced electrocatalytic reduction of oxygen	Weilin	XU
O13	1	Facile fabrication of three-dimensional highly ordered structural polyaniline/graphene bulk hybrid materials for high performance supercapacitor electrodes	Hongyao	XU
O06	8	Sodium-oxygen batteries: chemical and electrochemical reaction mechanisms	Hossein	YADEGARI
K11	3	Design of advanced hybrid supercapacitors with high energy density	Xingbin	YAN
K14	3	Selective edge-positioning of sulfur and nitrogen in dual-doped carbon nanosheets with interconnected structure for oxygen reduction reaction	Wensheng	YANG
O02	5	Silicon anodes for lithium batteries - from science to engineering	Junbing	YANG
O10	3	Mesoporous metal nitride materials for PEM fuel cell application	Minghui	YANG
O11	1	Substrate effects on Li ⁺ deposition in lithium secondary batteries with competitive kinetics model	Yifu	YANG
O17	5	Facile synthesis of helically coiled porous carbon fiber and applications in electrochemistry catalyst fields	Keqin	YANG
O11	6	Electricity generation and bubble behaviors of an air-breathing microfluidic fuel cell with cylinder anodes operated under different tilted angles	Dingding	YE
O03	6	The sulfonated poly(phenylene) membranes containing multi-phenyl rings prepared by nickel catalyst	Jiho	YOO
O03	7	Studies of grafted and sulfonated poly(isatin-ethersulfone) membranes by super acid-catalyzed reaction for PEMFC applications	Jiho	YOO
K02	2	Experimental and computational study of proton exchange membrane electrolyzer cells for high-efficiency hydrogen production	Feng-Yuan	ZHANG
K03	3	Recent progress on flow battery: research and development	Huamin	ZHANG
K11	2	Hierarchical three-dimensional carbon nanostructures for flexible high-energy supercapacitors	Yuegang	ZHANG

O04	4	Nanocarbon-based structured materials for catalyst supports in fuel cells and electrochemical biosensors	Xuan	ZHANG
O10	5	Development of a high active area air-breathing micro-direct methanol fuel cell	Yinghui	ZHANG
O12	6	Novel MnCo ₂ O ₄ assemblies as anode materials for Li-ion battery	SM	ZHANG
O18	1	Key materials designation for lithium/sulfur batteries with high energy density	Hongzhang	ZHANG
O18	5	Ethanol-mediated co-precipitation: a general strategy to prepare 1D hierarchical manganese-based electrode materials for enhanced performances in lithium ion battery	Weixin	ZHANG
O04	5	Facile synthesis of core-shell structured s@polypyrrole composite as cathode of lithium-sulfur battery with ultrahigh capacity	Hongbin	ZHAO
O04	8	Metal organic framework derived porous carbon and metal oxide as anode materials for sodium-ion battery	Yang	ZHAO
O12	5	Preparation of free-standing 3D graphene foams	Naiqin	ZHAO
K07	1	Multistate near-infrared electrochromism and memory in electropolymerized films of ruthenium complexes	Yu-Wu	ZHONG
K18	3	Nanoalloy electrocatalysts	Chuan-Jian	ZHONG
O04	7	Dissolution and liquid crystals phase of polymeric carbon nitride	Zhixin	ZHOU
O08	2	Hierarchically porous N-doped graphene foam as highly efficient electrocatalysts for oxygen reduction	Xuejun	ZHOU
K14	2	The research of two backbones for high temperature proton	Hong	ZHU
O13	2	Controllable synthesis of three-dimensional hierarchical porous carbon networks via soluble salts in-situ templates as supercapacitor electrodes	S	ZHU
K13	3	TBD	Lin	ZHUANG
O17	3	Ag ₂ s-assisted growth of CuInS ₂ /CdS heterostructured nanorods	Chao	ZOU
